

## Cleaning

EPI can provide parts and assemblies at a variety of cleanliness levels.....from simple coolant removal to sub-cellular eradication. Discuss your requirements with our engineering group.

- Endotoxin removal and validation
- Gas plasma to micron level
- Nitric acid
- Deionized, reverse-osmosis via membrane, 16-18 MegOhm, Type 1 Lab water
- 40 kHz ultrasonic wash with/without Type 1 lab water, with/without isopropyl alcohol
- Isopropyl alcohol wipe
- Hand wash with surfactant
- Vacuum drying
- Centrifugal drying
- EPI is certified to perform cleaning, testing, and validation for several high technology industries
